EXPERIENCE

Freelance — Software Engineer

2020 - Present

- Developed and delivered high-quality, robust production code for a diverse array of projects and clients, including confidential engagements requiring strict adherence to Non-Disclosure Agreements (NDAs).
- Partner with designers, creative directors, project managers, and cross-functional engineers to transform creative concepts into production-ready technical solutions for clients/stakeholders, aligning with business objectives.
- Ensure an exceptional UX by providing comprehensive documentation, tech support, and regular site maintenance.
- Exemplify leadership by spearheading weekly close collaboration with peers and early-career software engineers, facilitating collaborations, knowledge shares, and mentorship.

See Jones Engineer Portfolio Web App — Software Engineer

2021 - Present

- Crafted an impressive personal portfolio as a captivating web application, meticulously showcasing a diverse array of personally developed projects, effectively highlighting technical prowess and creativity.
- Leveraged cutting-edge technologies, languages, and frameworks such as React, Three.js, Prime React, and CSS, demonstrating a comprehensive skill set and a keen eye for delivering exceptional UX.
- Employed Netlify as the hosting platform for the portfolio, ensuring seamless deployment and a high-performance experience for visitors, exemplifying an understanding of modern development practices and deployment workflows.
- Demonstrated commitment to continuous improvement and growth by consistently delivering regular updates, refining and enhancing the portfolio's UI, reflecting adaptability, attention to detail, and a drive for excellence.

Hypnotiq Musiq Player 2.0 — Software Engineer

2022 - 2023

- Crafted a mobile full-stack app leveraging React Native Expo and Firebase/Firestore, revolutionizing sleep habits and enhancing focus during studying. Users can seamlessly stream music from diverse audio categories tailored for improved sleep or concentration.
- Engineered a dynamic music player app boasting comprehensive CRUD functionality and resilient music playlists that persist across app reloads. Users can effortlessly curate playlists, aggregating their favorite tracks from local device storage for uninterrupted listening pleasure.
- Actuated intelligent playback status logic, empowering users with seamless control over playback actions such as play, pause, and skip forward/backward within playlists and songs, ensuring an immersive UX.
- Integrated secure Firebase authentication, facilitating hassle-free login, registration, and password recovery, bolstering the app's security and user privacy.
- Meticulously designed a responsive UI, ensuring optimal usability and UX across various mobile devices.

PERN Full-stack Boilerplate Template — Software Engineer

2023

- Employed Express framework to deliver an eCommerce boilerplate, equipped with preconfigured REST APIs, effortlessly facilitating seamless CRUD functionality for predesigned models encompassing products/users.
- Seamlessly implemented robust authentication mechanisms, empowering users with secure login, registration, and frictionless access to their personalized information in a responsive UI.
- Orchestrated a responsive design paradigm, meticulously fine-tuned for both web and mobile platforms, ensuring a flawless UX regardless of the device utilized, and enabling eCommerce businesses to reach and engage customers seamlessly across all touchpoints.

AAA Wildlife — Office Manager

2010 - 2020

- Devised and implemented innovative logistics and payroll systems, boosting productivity for a team of 20.
- Tripled customer proposal acceptance rates, increasing revenue by introducing streamlined proposal and invoice systems.
- Generated a 300% increase in weekly revenues by introducing an efficient proposal/invoice system.
